Walker Lane lift station reveals infected mosquito pool

LITTLE ELM (June 23, 2016) A trapping and surveillance check has revealed a positive result for the presence of the West Nile Virus in a mosquito pool in Little Elm.

“As part of our continuing Mosquito Management and Response Plan, we have mosquito traps in several locations,” says Assistant Town Manager Joe Florentino. “The trap at the water lift station on Walker Lane contained a mosquito that tested positive for West Nile Virus.”

Part of Florentino’s duties include oversight of the Little Elm Emergency Management Program, which oversees and implements the Mosquito Management and Response Plan. “Mosquito pool” is the term used for a group of mosquitoes caught and tested out of a single trap, unrelated to swimming or wading pools.

Results from the other traps set up in different parts of Town have proven negative as of this time. Signs will be placed along Walker Lane to alert residents of the positive test.

“There is no immediate danger,” said Florentino. “The chances of a human infection are greatly minimized when people take appropriate action.”

Taking a proactive approach can be very successful in limiting exposure to the virus, even when a positive has been identified. Officials strongly encourage residents to enact the “Four Ds” of prevention.

These include:

- **Drain** all standing water, and overturn containers, pots, and other areas where water can pool;
- **Dress** in light colored, long-sleeve and long pant leg clothing when outdoors;
- **DEET**-containing pesticides and repellents work best and are safe to use;
- **Dawn** and **Dusk** are when mosquitoes are most active and thus outdoor activity should be limited.

Florentino says crews will continue to apply larvicides to mosquito breeding areas and conduct surveillance measures. But he emphasizes that residents’ efforts are the best line of defense against the disease.

###

ABOUT LITTLE ELM – Little Elm is one of the state’s fastest growing communities. Nestled on the shores of Lake Lewisville, the Town was incorporated in 1966, adopting the Council/Manager form of government. The population increased dramatically over the last several years, growing from under 4,000 in 2000 to over 30,000 today. Little Elm’s population exceeds the state average in education and income, and is increasingly trending younger and technologically proficient. The Town’s footprint is just over 21 square miles and boasts some 66 linear miles of shoreline within its boundaries.
