Prescriptive Tradeoff Code Compliance Options Statement

Date: September 1, 2016

Prepared By: Building Safety
Approved By: Cruz Hernandez MCP, CBO.

RE: Requirements

I. Purpose

The purpose is to provide code compliance trade off options on meeting the Required Air Changes per Hour / ACH per 2015 IECC Sec. R402.4 Air Leakage and 2015 IRC Chapter 11 - N1102.4

II. Scope

The tradeoff will permit houses that test to less than or equal to 4 ACH as outlined in options # 1 and # 2, see attached ESL 4 ACH Prescriptive Tradeoff Code Equivalency Sheet

III. Requirements

Must meet all requirements as specified in the Prescriptive Tradeoff Code Compliance Options Sheet

IV. Responsibility

The responsibility for meeting all the requirements of the tradeoff options under this requirement shall be on the building contractor, owner or remodeling contractor.

Determination of Prescriptive Tradeoff Code Compliance Options
for the NCTCOG Region

In accordance with the Health and Safety Code, Section 388.003, subsection (e), the Energy Systems Laboratory of the Texas A&M University System has analyzed tradeoff code compliance options for the North Central Texas Council of Government (NCTCOG) Region to meet the requirements of the 2015 International Energy Conservation Code (IECC) and the 2015 International Residential Code (IRC).

These tradeoff options are deemed to be not less stringent than the residential provisions of the 2015 IECC and the 2015 IRC. The tradeoff relaxes the required 3ACH50 per Sections R402.4.1.2 (N1102.4.1.2) of the residential provisions of the 2015 IECC and the 2015 IRC. The tradeoff will permit houses that test to less than or equal to 4ACH50 as outlined in Options #1 and #2 below. The tradeoff is limited as follows:

1. Limited to one- and two- family residences with a conditioned floor area between 1,000 and 6,000 square feet.
2. Limited to one- and two-family residences containing between 2 to 6 bedrooms.
3. Assumes all ductwork and mechanical equipment is located in the unconditioned attic.
4. Assumes typical wood framing in the walls and roof.
5. Assumes one of the following heating/cooling systems:
   a. All electric system with a heat pump for heating, or
   b. A system with electric cooling and natural gas heating.
   (Note: electric resistance strip heating does not qualify for this tradeoff.)

### ESL 4ACH50 Prescriptive Tradeoff Code Equivalency Compliance

*Except for the values listed in the table, all other mandatory code provisions are applicable.

b The first value listed is the $R$-value of cavity insulation, the second value is the $R$-value of the continuous insulation or insulated siding.
Project Address: __________________________________________ Permit Number: ________________

N1101.13 (R401.2) – Projects shall comply with one of the following:

☐ Option #1a – Prescriptive: Sections N1101.14 (R401) through N1104 (R404):
  N1102 (R402) Building Thermal Envelope. [Using table N1102.1.2 (R402.1.2) INSULATION AND FENESTRATION REQUIREMENTS BY COMPONENT]
  N1103 (R403) Systems.
  N1104 (R404) Electrical Power and Lighting Systems (Mandatory).
  Plus all mandatory provisions

☐ Option #1b – Prescriptive-Using REScheck™ UA approach Only: Sections N1101.14 (R401) through N1104 (R404):
  N1102 (R402) Building Thermal Envelope.
  N1103 (R403) Systems.
  N1104 (R404) Electrical Power and Lighting Systems (Mandatory).
  Plus all mandatory provisions

☐ Option #2 – Section N1105 (R405) Performance Approach: Plus all mandatory provisions

☐ Option #3 – ENERGY STAR Certified Homes®

☐ Option #4 – Section N1106 (R406) Energy Rating Index Compliance Alternative

☐ Option #5 – ESL 4ACH50 Tradeoff Code Equivalency Compliance

*Except for the values listed in the table, all other mandatory code provisions are applicable.

b First value is cavity insulation, second is continuous insulation or insulated siding.

NOTE: Attach appropriate compliance option “compliance report”

I certify that I have reviewed the construction documents including, but not necessarily limited to, insulation materials and R-values; fenestration U-factors and SHGC values; area-weighted average U-factor and SHGC calculations; mechanical system design criteria; mechanical and service water heating system and equipment types, sizes and efficiencies; equipment and system controls; duct sealing, duct and piping insulation and location; and air sealing details; and that the project as designed satisfies the minimum requirements for the compliance approach selected above.
